Spray Tanning – Important Information

... The spray tanning process is accomplished by the application of a solution that contains the active ingredient, DHA (Dihydroxyacetone) DHA has been approved in cosmetic use by the FDA. The DHA solution is sprayed onto the skin manually with a HVLP (High Velocity Low Pressure) spray gun.

... Your spray on tan color will not provide you with protection from tanning beds or the sun. A quality sunscreen should still be worn.

... The tanning solution contains color that may transfer to clothing and other fabric items. Dark clothing should be worn during the spray tan development time. STYLEBAR LTD is not responsible for potential stains to clothing or fabric.

... If you have sensitive skin or allergies to sunless tanning products, we suggest consulting your physician prior to tanning.

... Allergic reactions are extremely rare but if you have never used a sunless tanning product, we suggest a patch test 24 hours before the full body application.

... You should follow written and verbal instructions provided by your tanning consultant. Failure to do so may adversely affect your tanning results.

... Your tan's duration is based on many factors such as age, skin condition, exfoliation rate, lifestyle, etc. STYLEBAR LTD has no control over these factors and makes no claims with regard to duration.

... STYLEBAR LTD will not be held responsible for any results of a sunless spray tan that has been applied over a home self tanning lotion or spray.

... Consult your tanning professional for tips, aftercare instructions and products to keep your sunless tan looking the best it can be.
